I am a junior Digital Media Studies student at the University of Rochester seeking a front-end web design internship. I have experience with front-end web programming, information architecture, visual design, and collaborative and iterative digital design.

### ➤ RELEVANT COURSEWORK

#### CSC 174 Advanced Front End Web Development Summer 2021

Built on knowledge of HTML5 and CSS with databases, CSS architecture, CSS frameworks, and information architecture. Visual design principles to influence typeface, layout, color, and other visual features of a site were introduced.

I collaborated with team members through GitHub. I designed and implemented final project's information architecture.

#### CSC 170 Introduction to Web Development Spring 2020

HTML5 and CSS with an introduction to JavaScript, PHP, and search engine optimization. Best practices rooted in the industry standard were emphasized.

#### DMST 104 Design in the Digital Age Spring 2020

An introduction to the digital design industry and the collaborative, iterative design process, from start to finish. Class deliverables included design research, user and domain analysis, requirements and context scenarios, framework and design language, form and behavior specification, and a rough design. I worked with a group to design a gameified fitness tracker and accompanying app. The course required team collaboration, project and time management, and presentation skills.

### ➤ PROJECTS

#### Visit Our Cities - a project for CSC 174 Summer 2021

<http://csc174.org/project02/>

I worked as the information architect on the final project for Advanced Front End Web Development. I decided what content should go on the site and how the information should be organized both on the website and on specific webpages. I wrote or chose all text and images that appear on the site and designed the guest book form and table. I coded all the HTML content.

### ➤ EDUCATION

#### University of Rochester Aug. 2019 to Current

3.9 GPA

Certificate in UX/User-Centered Design

Minors in Computer Science and Spanish

Rush Rhees Scholarship, Dean's List

### ➤ SKILLS

#### WEB DESIGN

Information Architecture

Database Integration

Mobile-Friendly Sites

UX/UI Design

Usability

Search Engine Optimization

Photoshop

Illustrator

Dreamweaver

Bootstrap

Figma

#### PROGRAMMING LANGUAGES

HTML5

CSS3

Java

Python

PHP

JavaScript

Flutter

Dart

#### OTHER SKILLS

Spanish - Intermediate to Advanced

Collaboration

Meeting Deadlines

Iterative Design

Problem-Solving
